Cold Connections: Rivets and More!

In this class students will learn about “cold connections” which are exciting and useful techniques of joining metal pieces without using heat. These methods are useful when working with heat-sensitive materials, found objects, or when a soldering setup is unavailable. Students will be able to make a variety of sample cold connections. This class will add more technical knowledge to the students’ skillset and more possibilities to their designs!

Instructor: MARTHA FERGUSON

Metalsmithing –Intermediate Level (Must have introductory skills of sawing and filing)
